

§ 255.5

14 CFR Ch. II (1–1–01 Edition)

(i) Fewer than fifteen connecting points and six double connect points meet the service criteria described in paragraph (c)(1) of this section; and

(ii) The system has used all the points that meet those criteria, along with all additional connecting points and double connect points requested by participating carriers.

(6) If a system selects connecting points and double connect points for use in constructing connecting flights it shall use every point requested by itself or a participating carrier up to the maximum number of points that the system can use. The system may use fewer than all the connect points requested by itself and participating carriers to the extent that:

(i) Points requested by the system and participating carriers do not meet the service criteria described in paragraph (c)(1) of this section; and

(ii) The system has used all the points that meet those criteria.

(d) Each system shall apply the same standards of care and timeliness to loading information concerning participating carriers as it applies to the loading of its own information or the information of a system owner. No system owner may use procedures for providing information on its own services to its system that are not available to participating carriers. Each system shall provide to any person upon request all current data base update procedures and data formats.

(e) Systems shall use or display information concerning on-time performance of flights as follows.

(1) Within 10 days after receiving the information from participating carriers or third parties, each system shall include in all integrated schedule and availability displays the on-time performance code for each nonstop flight segment and one-stop or multi-stop single plane flight, for which a participating carrier provides a code.

(2) A system shall not use on-time flight performance as a ranking factor in ordering information contained in an integrated display.

(f) Each participating carrier shall ensure that complete and accurate information is provided each system in a form such that the system is able to

display its flights in accordance with this section.

(g) A system may make available to subscribers the internal reservations system display of a system owner or other participating carrier, provided that all participating carriers are offered the ability to make their internal reservations displays available to subscribers, and provided further that a subscriber and its employees may see any such display only by requesting it for a specific transaction.

[Amdt. 255-9, 57 FR 43834, Sept. 22, 1992, as amended at 62 FR 63847, Dec. 3, 1997]

§ 255.5 Defaults and service enhancements.

(a) In the event that a system offers a service enhancement to a system owner or other participating carrier, it shall offer the enhancement to all participating carriers on nondiscriminatory terms, except to the extent that such service enhancement is still in the development stage or that participation is not immediately feasible for technical reasons, in which event the system shall make it available to all participating carriers as soon as possible.

(b) After October 1, 1993, no system may create or maintain a default in any system feature that automatically prefers one or more system owners over other participating carriers.

§ 255.6 Contracts with participating carriers.

(a) No system may discriminate among participating carriers in the fees for participation in its system, or for system-related services. Differing fees to participating carriers for the same or similar levels of service shall be presumed to be discriminatory.

(b) No system may condition participation in its system on the purchase or sale of any other goods or services.

(c) Notwithstanding paragraph (b) of this section, a system may condition participation in its system in the United States on a participating carrier's agreement to participate in the system or affiliated systems in other countries, if the system and such affiliates agree that:

(1) The display of services in such system and its affiliates will not use
